- :)
- A kind TA who has yet presented his sharpness and knowledge in the field of linear algebra
- Eric is a very nice person. He is accessible outside the section. But there is one problem during the section. In the section, students do not want to answer his question. Sometimes it is not that they don't know the answer. It is because they were unsure or too shy to answer the question. I hope Eric do not wait until one answers the question, which can save much time to talk about more useful materials.
- Eric is a wonderful instructor. I feel, he really connected with students and was able to provide most with a greater understanding of the subject. Also, he seems to have great knowledge and passion for the subject with resonated in his teaching ability.
- Eric is an incredible teacher who is able to convey his understanding of mathematics in a form which students can easily understand.
- Eric is super knowledgeable and willing to help every student during his office hour. He guides you to work out the answer instead of directly telling you the key. In the section, he also provides a good review of the lecture and sometimes beyond the lecture. You can really learn a lot from him!
- Eric is the best IA, he is extremely helpful and his explanations are always very clear and easy to follow.
- He was a good TA.
- I wish I was Eric Lybrand. Then I know I would 100% pass this class.
- Nope!
- The instructor knows where we are confused and explains very clearly
- Very great TA. Really helps with learning and understanding the material. Also really puts effort into getting to know the students.
- Yo Eric, just wanted to let you know how cool you are and how much you've helped through the past quarter. Even though you didn't go against school policy and accept that one late assignment that I forgot to turn in, I still think you're the coolest dude ever.
